

TABLE OF CONTENTS:

- 3. Multiple Chrome browser profile benefits
- 4. Setup multiple Chrome browser profiles
- 9. Google Chrome bookmarking bar installation
- 10. Add bookmarking buttons for easy bookmarking
- 11. High performance Chrome browser profiles
- 12. Automatic status updating machine

THE BENEFITS OF MULTIPLE CHROME BROWSER PROFILES ARE ENDLESS!

- Keep client accounts organized.
- Install extensions on each browser profile.
- Setup plugins on each browser profile.
- Stay logged into Facebook, Twitter, Google+ and LinkedIn at the same time with multiple accounts.
- Easily manage multiple clients.
- No more logging in and out of accounts.
- Assign proxies to each browser for anonymity.
- Assign bookmarking buttons to each browser profile.
- Save all passwords associated with each profile in browser.

SO WITHOUT FURTHER ADO LET'S

SETUP MULTIPLE CHROME BROWSER PROFILES:

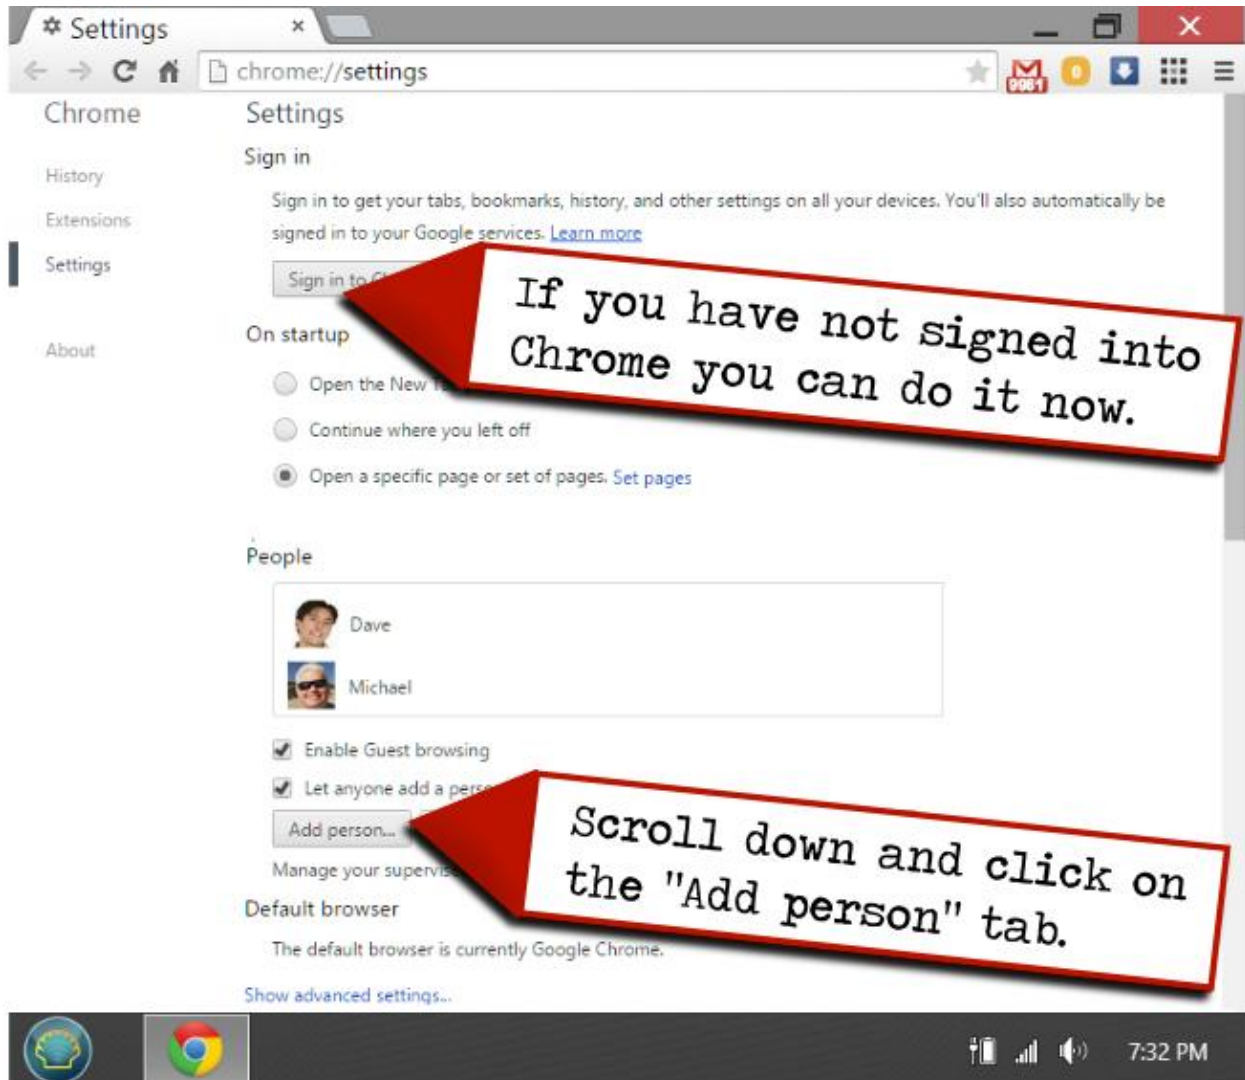

The following instructions will teach you how to create multiple browser profiles in Google Chrome which will allow you to easily manage multiple profiles and client accounts. (For Firefox instructions see below). If you have not installed Google Chrome do it now. <https://www.google.com/chrome/browser/desktop>

Step 1: First open up Google Chrome.

From your Google Chrome browser click the far right button.

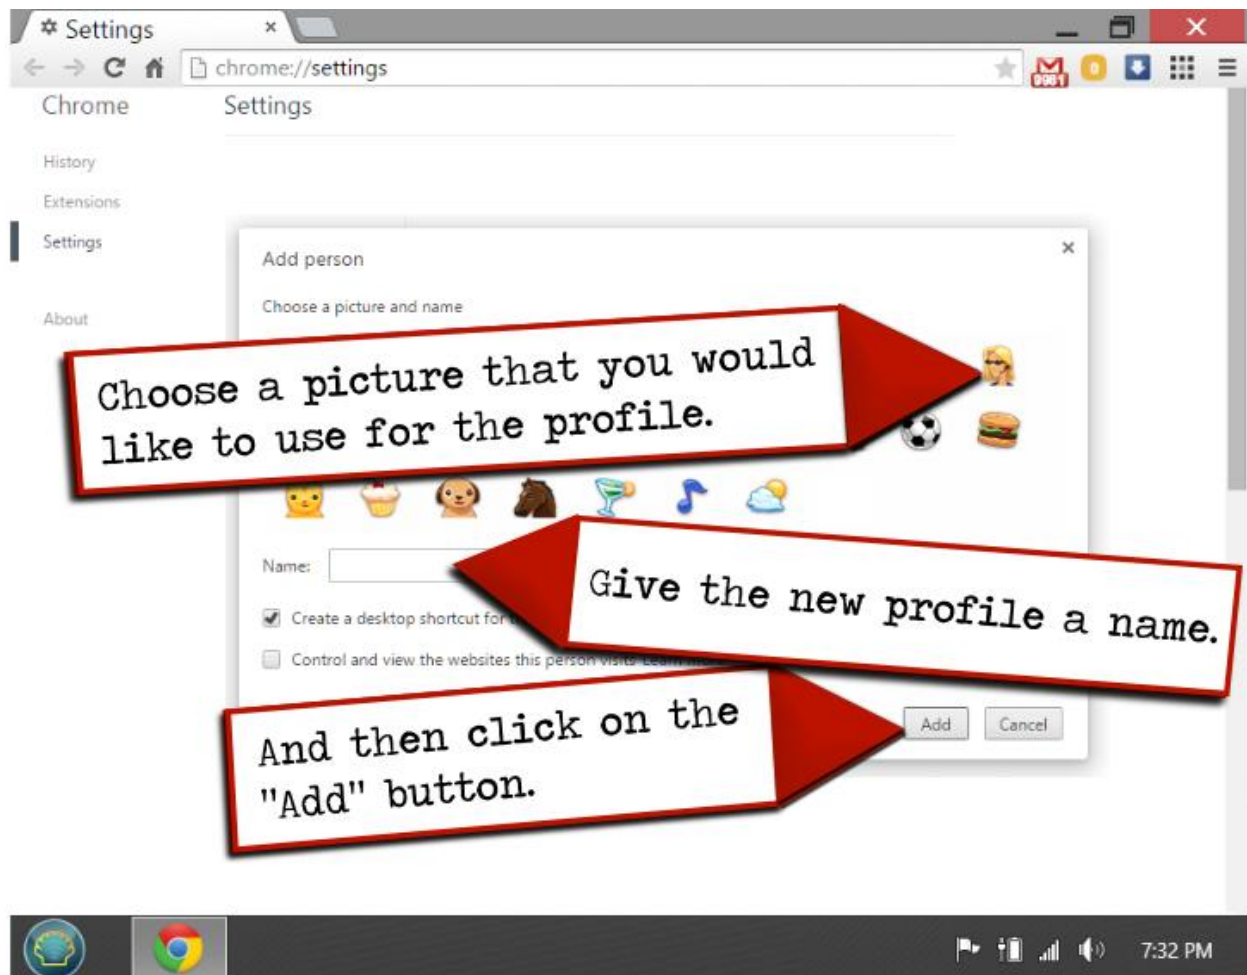

A drop down will appear. Click the "Settings" tab.

After you click the "Settings" tab a new page will appear. On this page if you have not already signed into Google Chrome with your primary email account you can do it now.

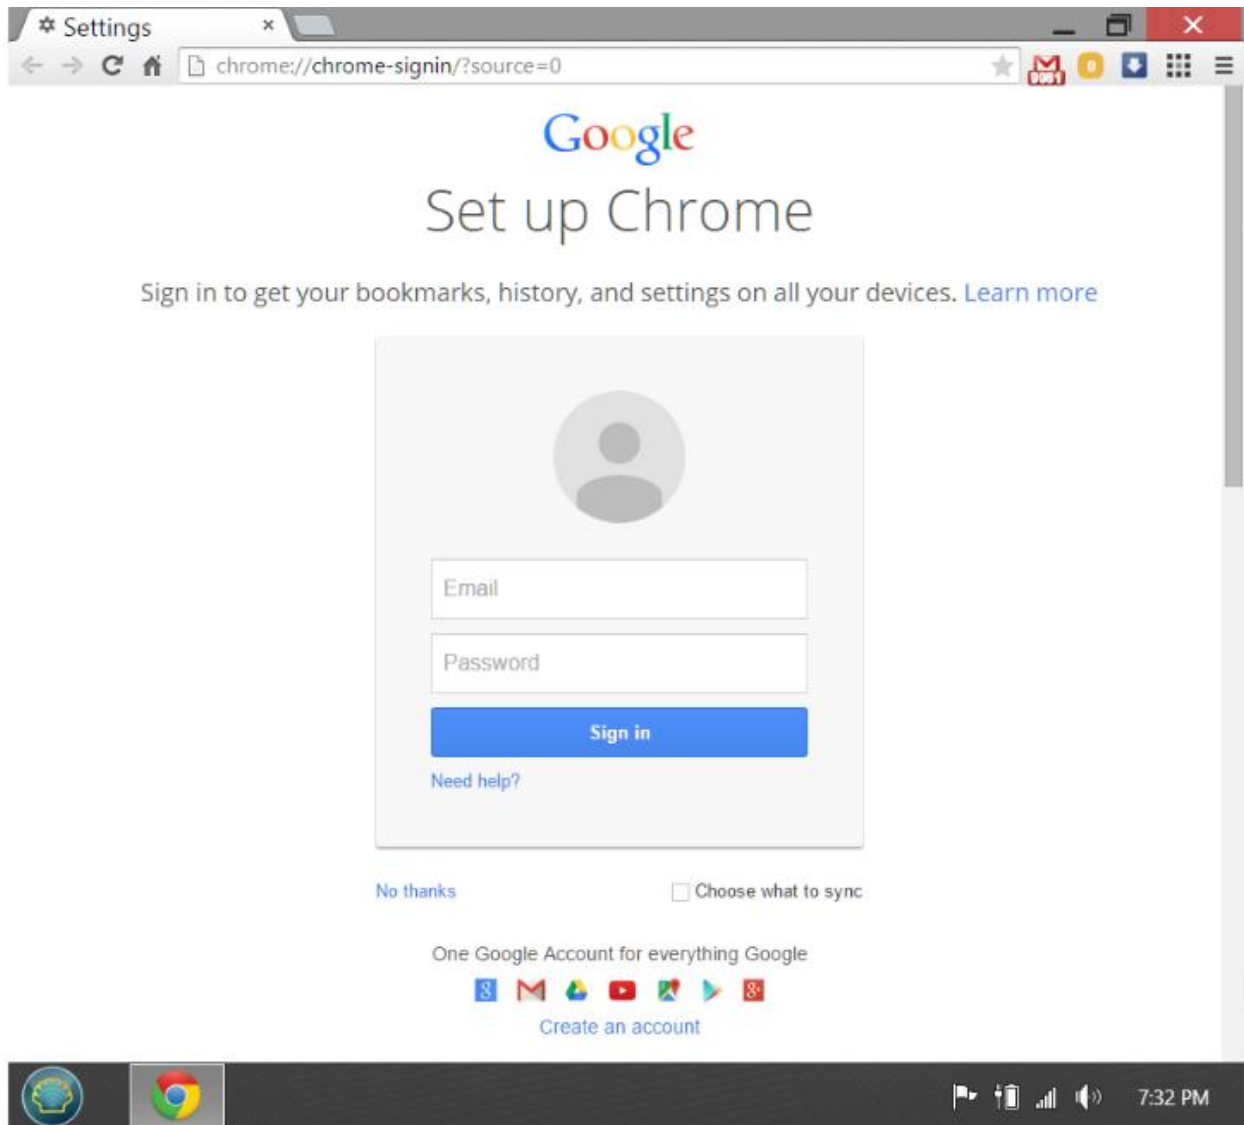

The next page that pops up is where you will add the second browser profile.

This is where you will add your second profile. Follow the instructions in the image below.

Once you click the "Add" button a new browser window will pop up to set up the new Chrome browser profile. (See the next page)

If you already have a Gmail account ready then use that Gmail account to sign in. Or create a new Gmail account to start building the new profile.

...and that's it. You now have a second Chrome browser profile setup.

Now that you have created a second Chrome browser profile you will notice that an additional Chrome icon has appeared on your desktop. To keep the Chrome browser profiles organized you can create a folder on your desktop and add the Chrome profiles to the file.

After you have set up additional browser profiles you will have the ability to stay logged into all of your favorite social sites at the same time. Each browser profile will save the login's and passwords for each of the websites that the browser profile is signed up with.

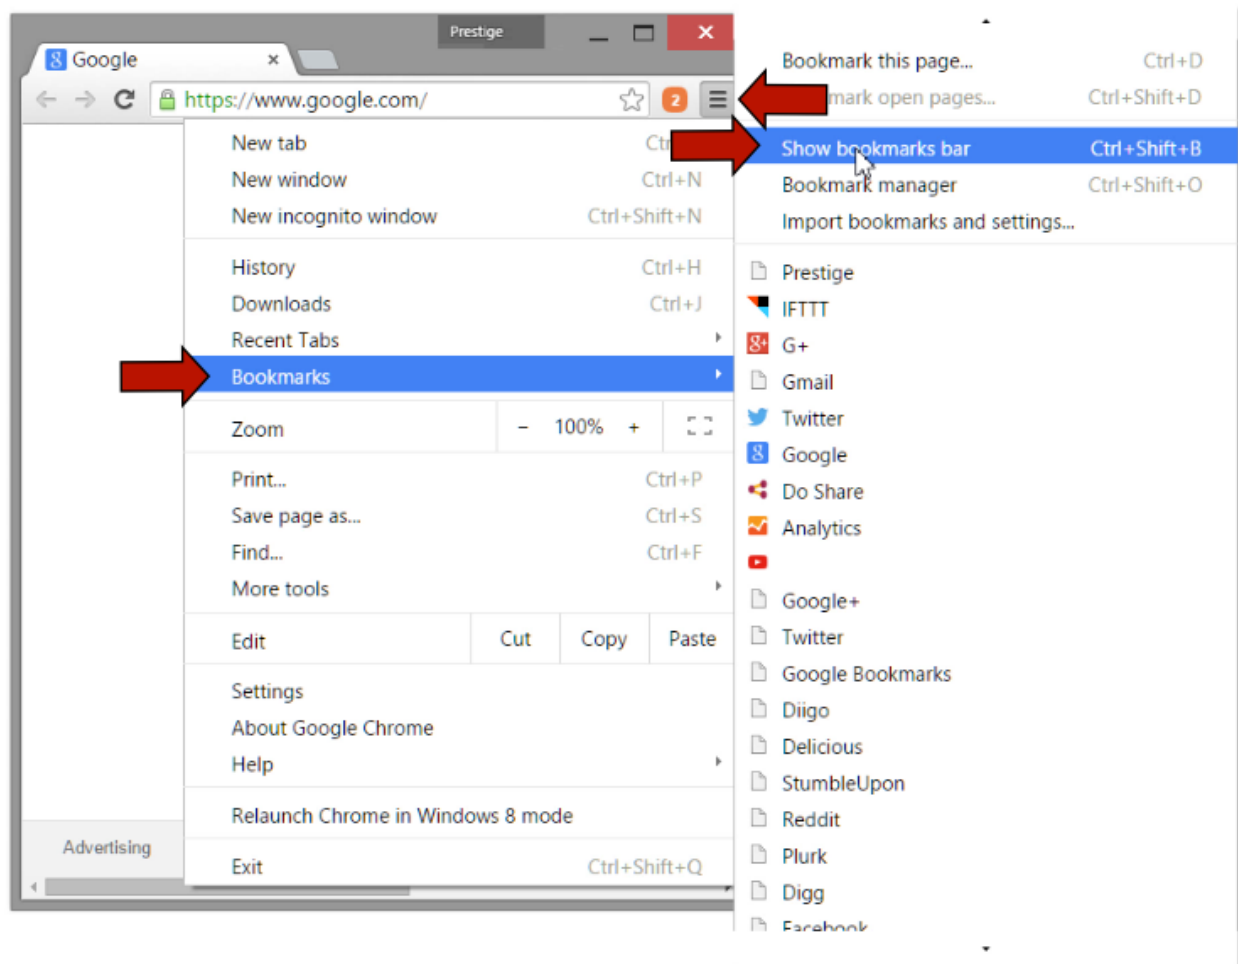

You can create as many browser profiles as you want using the instructions listed in this manual.

GOOGLE CHROME BOOKMARKING BAR TIPS.

For more usability and effectiveness we suggest setting up the bookmarking bar within each Chrome browser profile.

To engage the bookmarking bar first click the box with 3 lines at the top right hand of your Google Chrome browser window.

Next click "Bookmarks". Then click "Show bookmarks bar". ...and that's it. The bookmarks bar is now installed.

ADD BOOKMARKING BUTTONS FOR EASY BOOKMARKING.

Many social media sites offer bookmarking capabilities. The free service "Add to any" is a great way to add bookmarking buttons to your browser profile. This free service allows you to either drag-and-drop bookmarking buttons into the browser bar or to install a single button in the browser bar to easily bookmark your favorite media. <http://addtoany.com>

HIGH PERFORMANCE CHROME BROWSER PROFILES.

When running 10+ Google Chrome profiles at the same time users with slow internet connections and under-built processors may experience poor performance. It is best to dedicate a computer to run multiple browser profiles – Not entirely necessary if your internet connection is fast and your computer is up-to-date.

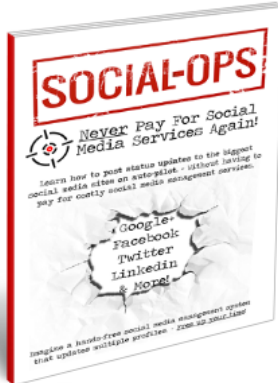

One option to speed everything up is to pay monthly for a dedicated server with Google Chrome installed on it. With a dedicated server Chrome will always be up and running without sacrificing computer performance. Many top quality dedicated servers cost less than \$50 a month.

The following dedicated servers have proven to be powerful and affordable:

Budget VM - <https://goo.gl/iuqBCn>
GoDaddy VPS - <https://goo.gl/hfpj7m>
HostGator VPS - <http://goo.gl/SI7Aq9>
MochaHost - <http://goo.gl/qNzw8h>
CloudHostSPace - <http://goo.gl/hIYnRF>
A2 Hosting - <http://goo.gl/Tv3QgP>

TURN EACH CHROME BROWSER PROFILE INTO AN AUTOMATIC STATUS UPDATING MACHINE!

Are you tired of paying for monthly social media management services?

Introducing: Social-Ops

Imagine a hands-free social media updating system that updates multiple profiles. – Free up your time!

Put your Chrome browser profiles on steroids!

In our next ebook in the series you will learn how to configure each browser profile to automatically syndicate scheduled status updates to Google+, Twitter, Facebook, LinkedIn and all of the other top social media sites.

- ✓ Schedule status updates months in advance.
- ✓ Access scheduling system from any computer.
- ✓ Post to Google+, Twitter, LinkedIn, Facebook & More.
- ✓ Multiple client management system stays organized.
- ✓ Stop paying \$\$\$ to social media scheduling services.
- ✓ Save time and focus on more important objectives.
